## SECTION D - COST ESTIMATES

(Enter cost estimates for making available to shelterees the total quantities of potable and non-potable water shown in Columns (1) and (2) of Section C. Estimates are for planning purposes, only, and will be based upon the best on-site information readily available. Include under "Remarks" a brief description of modifications and major features contributing to the costs. If desired, a simple sketch may be attached)

SECTION E - SEWERAGE SYSTEMS

(Section E will be completed only when quantities  
are shown in the "Totable" column in Section C)

1. Estimated sewage quantity:

1941 Gal/day

(Use 1 gal/day/space for the number of shelter spaces shown in Item B-1.  
Note: This figure is assumed for the purposes of this survey only, and  
includes an allowance for flushing).

2. Estimated capacity of sewer main(s)  
from building:

155,500 Gal/day

(Include existing sanitary, storm and/or other sewer mains which operate  
by gravity flow, only. Do not include flow from a sewage lift station  
in building unless stand-by power is available for its operation).

3. Water closets available to shelters:

10 Units

(Include all water closets within or accessible to the shelter areas in  
the building without direct exposure of personnel to radiation).

4. Estimated modification costs:

(Modifications will be considered only when entry in Item 2 is less than  
Item 1, above; or when shelter area(s) have no access to a gravity sewer  
or storm drain without direct exposure of personnel to radiation.  
Include modifications, such as the addition of a "wye" or "tee" for  
access into the line. Do not include items such as major extensions to  
or re-routing of existing lines, or addition of pumps or power for pump-  
ing. Cost estimates are for planning purposes, only and will be based  
upon the best on-site information readily available. If desired, a  
simple sketch may be attached).
